

## **Rainin Instrument World Headquarters Oakland, California**

Liftech designed the structure for a 207,000 square foot, two-story office and manufacturing building. The facility contains executive and engineering offices, research labs, a pipette service lab, a manufacturing plant, and distribution. The building has tilt-up concrete construction, a steel frame metal deck and concrete fill mezzanine, and a steel joist framed with metal deck roof. The foundation system is piles with grade beams.
