LIFTECH CONSULTANTS INC.

Rasmussen BMW Remodel / Addition Portland, Oregon

Liftech designed the structure for a 3,600 sq ft addition to an existing BMW showroom and offices. The new addition is used for showcasing Mini Cooper cars. It consists of a steel structure with concentric braced frames and a steel walkway and mezzanine. These elements are exposed as part of the architecture. The walkway and mezzanine, which connect to the second floor of the existing building, are hung from the roof.
