

Crane Procurement Puerto de Cartagena, Colombia

Liftech was retained by Sociedad Portuaria Regional de Cartagena (SPRC) to provide engineering services for the procurement of two ship-to-shore container handling cranes for Puerto de Cartagena. SPRC chose Noell Crane Systems to provide the 60 t, 51 m outreach cranes. The cranes were built by Noell China in Xiamen, China.

Liftech provided review of the design and manufacturing. We reviewed the crane construction in China and provided a final walkthrough in Cartagena.
