

Crane Move System

Liftech designed a crane move system for moving container cranes that was easy to ship and assemble.

Liftech designed a modular system with container sized components for shipping. The system can be assembled away from a crane, allowing the crane to continue working until it is moved. The container crane is secured to the system with four pins and lifted for transport.

The crane move system can move 50 ft to 100 ft gage cranes that weigh up to 1600 t on wharf decks that are designed for 1000 psf live loads.
